## A

- Abort control string 6-12
- ALPHA/MULTI key 5-8
- Alphanumeric data 5-3
- Application
  - custom 4-2
  - program 4-2
  - standard 4-2
- Application Code 3-1
- Application ID 6-7
- Auto answer 6-8
- Auto answer processing 6-11
- Auto answer speed 6-10
- Autonet 7-8
- Auxiliary control string 7-7

## B

- Bar Code Wand 1-3 - 1-4, 2-5
  - troubleshooting 8-2
- Bar code wand test 8-6
- Baud rate 6-10
  - generic printer 6-9
- Beep 6-4
- Bell/CCITT Mode 6-10
- Busycomm 7-8

## C

- Cable routing channels 1-3, 2-7
- Calendar/Clock
  - resetting 5-9
- Card reader
  - operation 5-1
- Card reader test 8-6
- Cardreader 5-1
  - ABA track 2 1-2

- ISO track 1 1-2
  - usage 1-2

- Compuserve 7-8
- Connet 7-8
- Control String
  - auxiliary 7-7
  - communication error 6-13
  - linking 7-6
  - response analysis 7-7
  - transaction 7-6

## D

- Data format
  - generic printer 6-9
- Datapac 7-8
- Diagnostics
  - bar code wand test 8-6
  - card reader test 8-6
  - display test 8-5
  - memory test 8-4
- Dial speed flag 6-5
- Dial type flag 6-5
- Dial-up line
  - upload/download speed 6-10
- Direct PC download 3-4
- Display messages
  - diagnostics 8-5
- Display panel 1-2
  - troubleshooting 8-2
- Download
  - direct PC 3-4
  - full 3-5
  - master terminal 3-2
  - partial 3-5
  - phone number 6-2

## D

- slave terminal 3-3
- telephone 3-7
- terminal-to-terminal 3-1

## E

- Error codes 5-12
- Error condition
  - display and override 5-13
- Error condition recovery 5-12
- Error messages 8-1

## F

- Floor limit 7-6
- Fraud control 7-5
- Free memory reclamation 6-12
- Full download 3-5

## G

- Geisco 7-8

## H

- Handshake
  - generic printer 6-9
- Host
  - bar code transactions 6-13
  - card transactions 6-13
- Host transactions 4-1

## I

- Idle loop 6-12
- Idle prompt 5-1, 6-7

## K

- Keypad 1-2
  - diagnostics 8-4
  - entering alphanumeric data 5-3
  - programming 4-3
  - troubleshooting 8-3

## L

- Line recovery time 6-12
- Local functions 4-2
- Local transactions 4-2
- Login strings 7-8
- Luhn check-digit 7-4

## M

- Master terminal 3-2
- Memory
  - locked, unlocked 5-5
  - re-initialization 5-13
- Memory dial phone numbers 6-8
- Memory dialing 5-2
- Memory locations 4-3
- Memory test 8-4
- Merchant identification number 7-4
- Message format flag
  - See Transaction format flag
- Message sequence number 6-3
- Modem 1-4
  - Bell (optional) 1-4
  - CCITT V.21/V.22 300 baud 1-4
  - leased-line (standard) 1-4
- Multiple transaction
  - timeout 6-4
